Great Plains Population and Environment Data: Agricultural Data, 1870-1997 [United States]

Myron P. Gutmann, Principal Investigator

Study Description

Introduction

The data in this series of studies were collected by an interdisciplinary research team between 1995 and 2004, as part of a research project funded by the National Institute of Child Health and Human Development (Grant Number R01 HD33445 to the University of Michigan). The goal of the project was to collect information about approximately 500 counties in twelve states of the Great Plains of the United States, and then to analyze those data in order to understand the relationships between population and environment that existed between the years of about 1870 and 2000.

The original conceptualization of the project was to study counties, so the data distributed here are all data about counties. The data fall into four broad categories: about the counties, about agriculture, about demographic and social conditions, and about the environment. The information about counties (name, area, identification code, and whether we classified the county as part of the Great Plains in a given year) are embedded in each of the other data files, so that there will be three series of data (agriculture, demographic and social conditions, and environment), with individual data files for each year for which data are available. As the data are finalized for release, we are making them available to the research community as part of a series entitled "Great Plains Population and Environment Data." The Investigators intend to make all the data they have collected available for public use, subject to the conditions imposed by the original sources of the data.

The Counties

The Great Plains are part of the great natural grassland that stretches across the central part of North America eastward from the Rocky Mountains. We define its boundaries primarily in terms of natural conditions. We set its boundaries on the east at the line of 700 mm of average annual precipitation, and on the west at 5,000 feet of elevation. We bound the Great Plains on the north at the Canadian border and on the south in Texas and New Mexico at the 32nd parallel. Much of the Great Plains is a high plain, more than 2,000 feet above sea level and sloping ever upward as it moves west. The counties of the Great Plains share some environmental characteristics, but because of their range of soil, temperature, precipitation and elevation, are also quite different from each other. The southern plains and the northern plains are not the same; nor are the eastern and western Great Plains. What these sub-regions share is the flat or slightly rising treeless expanse that must have greeted all early visitors, and the preponderance of grasses in their natural vegetation. The result of our selection procedure is a set of about 500 counties (in recent

years) in Montana, Wyoming, Colorado, New Mexico, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Texas, Minnesota, and Iowa that share a number of environmental characteristics while retaining a considerable amount of diversity.

The project has collected data for all counties within these twelve states (approximately 1010 in recent years). The data files (for agriculture, for demographic and social conditions, and for environment) list each county in each year for which we have collected data, by name and by state and county Federal Information Processing Standards (FIPS) 6-4 Codes¹, the geographic area of the county, and whether the county falls within the boundaries of the Great Plains as we have defined them.

Agricultural Data

The agricultural data included in this Series consists of a single data file for each agricultural census year between 1870 and 1997 that includes selected material compiled as part of the U.S. Agricultural Census. The U.S. Census of Agriculture has been conducted since 1850 on a regular schedule that was decennial until 1920, and more frequently since (every five years from 1925 to 1950, then in 1954, 1959, 1964, 1978, and every five years since 1982). The county-level agricultural data produced by the U.S. government as part of the Census constitute a remarkable and consistent series of measures of changing agriculture and land use.

The data in the Great Plains Population and Environment Data series are a subset of the variables available from the total body of Agricultural Census information for counties. They were produced by extracting information from previously existing digital files (ICPSR Study No. 3, ICPSR Study No. 2896, Data digitized by the Economic Research Service of the United States Department of Agriculture (USDA), and digital versions of the Agricultural Census produced by the U.S. Bureau of the Census and the USDA), and by manually digitizing selected variables from the volumes published by the U.S. Bureau of the Census and the U.S. Department of Agriculture. All the sources used are listed later in this document. We also list digital versions of the data where they exist. Some of these are part of the ICPSR collection, while others are not.

We have attempted to give the variables consistent names, as shown in the documentation for these files. It is important for data users to recognize that there are sometimes significant but subtle differences between what may appear to be the same variable in two different census years. Where possible our technical documentation emphasizes those differences, but to be certain the data user may need to do his or her own exploration into the sources.

¹ For a description of the FIPS 6-4 Codes, see <http://www.itl.nist.gov/fipspubs/fip6-4.htm>. For counties dissolved before FIPS codes were implemented, we used a combination of codes created by the HUSGO project and codes created by the Great Plains Project. We followed the geography used by the Census Bureau, and also assigned new codes to counties that were substantially different geographic areas than in later censuses.

Missing Values

Virtually all the data in the Great Plains Population and Environment database are drawn from published tabulations of administrative and survey data at the scale of the U.S. County. In the database, some of those data are characterized as “missing,” and assigned to one of the categories identified in this table. There are a number of reasons why data may be missing for a given variable for a given county in a given year. At the simplest, the county might not yet have been created at the time of that census, or the Census Bureau (or other data producer) might have combined two or more counties into a single tabulation unit for a specific publication. Other reasons for data being missing may have something to do with the characteristics of the county. For example, some counties do not have a climate suitable for growing a specific crop, which we see for cotton -- tabulated for Texas but never for North Dakota. In another common example in the agricultural data, counties with data from too few farms in a single tabulation would be recorded as “missing” in order to prevent the characteristics of those farms from being revealed in the data. Finally, data are missing because there has been some problem in reproducing them, either because the original publication is illegible, or because we have constructed them from multiple sources and one or more of those sources is itself missing.

The research team that produced these data has maintained the fine grain of different types of missing data because we believe that the different kinds of missing data reveal important information that may be useful in their analysis.

Missing values frequencies are not included the summary statistics in the following codebook. They will be found in the data files as negative values. All negative values in the datasets are missing values. Missing values have been coded according to the table on the next page.

Missing Value Coding

Code	Explanation
-1	Data not applicable* FOR EXAMPLE: Agricultural data from Indian Reservations were recorded according to county boundaries in 1910. Therefore, the values for Pine Ridge Indian Reservation, South Dakota, are -1.
-2	Data not available* Data not available (not reported, schedules destroyed, information lost, etc.) - ICPSR -9*** No data available (same as -9) - ICPSR -1***
-3	Less than half of the unit shown*
-4	Withheld for privacy. Withheld to avoid disclosing data for individual farms* Data not reported to avoid violation of confidentiality rules of data collector (e.g., the Census Bureau)***
-5	Data not published for this state or county**
-7	Data included in "all other""*** In some tables, not all counties were explicitly tabulated. Those that were not constituted as separate unit, labeled "All Other." For example, irrigation data data were only reported for 8 counties in Kansas in 1920, with the rest grouped into "Other Counties." Therefore, most counties in Kansas have values of -7 for the irrigation variables.
-8	Data illegible in published volumes***
-9	Data has special problems (see footnote in original source)**
-10	Data included under another entry (combination of two or more variables, etc.) *** These variables are set off by brackets in the published tables.
-11	Data recorded under another political unit*** For example, San Juan County, Colorado, data were included with the data for La Plata County in 1940. Therefore, the values for San Juan County are -11.
-13	Sum of missing values. Variable is the sum of variables where the value is missing for all components. This flag appears only as a result of programming.**
-14	Result of merge. Variable is not available or was not collected for this unit, but appears in master data files as the result of merging multiple files. This flag appears only as a result of programming.**
-15	Sum with missing value(s). Variable is the sum of other variables, where the value is missing for one or more of the components. This flag appears only as a result of programming.**

Agricultural Data Codebook

Contents:

Table 1. Agricultural Variables by Category

Data Codebook

Table 2. Agricultural Variables Sources

Table 1. Agricultural Variables by Category, lists the variables in the data file, with the variable name assigned by the Great Plains Project in the first column and a longer variable description taken from the original source in the second column. This description preserves the relationships of items in the original source tables. The variables are grouped into the following categories:

- Grains and Hay
- Row Crops and Vegetables
- Land
- Inputs
- Livestock, Poultry and Dairy
- Market Value

Within each category variables are listed in the order they are found in the source (generally Volume, Table and then order within the Table). Variables are presented in the same order in the Data Codebook and in Table 2.

Data Codebook provides fuller descriptions of each variable, including:

- Variable name
- Brief variable description (which also serves as the variable label)
- Full description from the original source
- Variable source
- Additional notes about the variable not contained in the descriptions
- Summary statistics

Table 2. Agricultural Variables Sources, provides the full name of the source table where applicable, information on variables created by the Great Plains Project, the name of the source (generally the Census Volume), and the organization that keyed the data. Full bibliographic citations are listed above.

FRM_SO_Q	Number of Farms: 140 to 179 Acres
FRM_SQ_Q	Number of Farms: 180 to 219 Acres
FRM_ST_Q	Number of Farms: 220 to 259 Acres
FRM_SH_Q	Number of Farms: 260 to 499 Acres
FRM_SI_Q	Number of Farms: 500 to 999 Acres
FRM_UJ_Q	Number of Farms: 1,000 to 1,999 Acres
FRM_UK_Q	Number of Farms: 2,000 Acres or More
FRM_OF_Q	Farms: All Farm Operators: Full Owners
FRM_OP_Q	Farms: All Farm Operators: Part Owners
FRM_MX_Q	Farms: All Farm Operators: Managers
FRM_TX_Q	Farms: All Operators: All Tenants
FML_OF_A	Land in Farms (Acres): All Farm Operators: Full Owners
FML_OP_A	Land in Farms (Acres): All Farm Operators: Part Owners
FML_MX_A	Land in Farms (Acres): All Farm Operators: Managers
FML_TX_A	Land in Farms (Acres): All Farm Operators: All Tenants

Input Variables	
TRA_XX_Q	Tractors Other than Garden: Number
FRT_BQ_Q	Use of Commercial Fertilizer and Lime: Commercial Fertilizer and Fertilizing Materials: Farms
FRT_BX_A	Use of Commercial Fertilizer and Lime: Commercial Fertilizer and Fertilizing Materials: Acres
FRT_BX_T	Use of Commercial Fertilizer and Lime: Commercial Fertilizer and Fertilizing Materials: Tons
FRT_LX_A	Use of Commercial Fertilizer and Lime: Lime or Liming Materials: Acres
FRT_LX_T	Use of Commercial Fertilizer and Lime: Lime or Liming Materials: Tons
FRT_BX_V	Specified Farm Expenditures: Fertilizer and Fertilizing Materials: Dollars
FRT_XX_A	Sum in ERS Datafile

Livestock, Poultry, and Dairy Variables

CTL_XX_Q	Any Cattle, Hogs, or Sheep on Hand: Cattle and Calves: Number
CTL_FX_Q	Any Cattle, Hogs, or Sheep on Hand: Cows and Heifers that Have Calved: Number
CTL_MX_Q	Any Cattle, Hogs, or Sheep on Hand: Cows and Heifers that Have Calved: Milk Cows: Number
CTL_HX_Q	Any Cattle, Hogs, or Sheep on Hand: Heifers and Heifer Calves: Number
CTL_SX_Q	Any Cattle, Hogs, or Sheep on Hand: Steers and Bulls, Including Calves: Number
CTL_GX_Q	Sum in ERS Datafile
CTL_LX_Q	Sum in ERS Datafile
SWN_XX_Q	Any Cattle, Hogs, or Sheep on Hand: Hogs and Pigs: Number
SHP_XX_Q	Any Cattle, Hogs, or Sheep on Hand: Sheep and Lambs: Number
CHK_XX_Q	Chickens 4 Months Old and Over: Number
CHK_TX_Q	Sum in ERS Datafile
CTL_TX_Q	Livestock Sold Alive: Cattle and/or Calves: Number
CTL_TA_Q	Livestock Sold Alive: Cattle and/or Calves: Cattle, Not Counting Calves: Number
CTL_TB_Q	Livestock Sold Alive: Cattle and/or Calves: Calves: Number
SWN_TX_Q	Livestock Sold Alive: Hogs and Pigs: Number
SHP_TX_Q	Livestock Sold Alive: Sheep and Lambs: Number
HRS_TX_Q	Livestock Sold Alive: Horses and Mules: Number
CHK_TD_Q	Poultry and Poultry Products Sold: Poultry and Poultry Products: Broilers and Other Meat-Type Chickens: Number

Market Value Variables

FML_BX_V	Value of Land and Buildings: Average Per Farm: Dollars
FML_BQ_V	Value of Land and Buildings: Average Per Acre: Dollars
AFP_TX_V	Value of Products Sold by Source: All Farm Products Sold: Dollars
CRO_TX_V	Value of Products Sold by Source: All Farm Products Sold: All Crops: Dollars
VEG_TX_V	Value of Products Sold by Source (Dollars): All Farm Products Sold: All Crops: Vegetables: Dollars
FRU_TX_V	Sum in ERS Datafile: Dollars
FST_TX_V	Sum in ERS Datafile: Dollars
OFC_XX_V	Sum in ERS Datafile: Dollars
STK_TC_V	Value of Products Sold by Source: All Farm Products Sold: All Livestock and Livestock Products: Dollars
POL_TC_V	Value of Products Sold by Source (Dollars): All Livestock and Livestock Products: Poultry and Poultry Products: Dollars
MLK_TA_V	Value of Products Sold by Source (Dollars): All Livestock and Livestock Products: Dairy Products: Dollars
STK_TE_V	Value of Products Sold by Source: All Farm Products Sold: All Livestock and Livestock Products: Livestock and Livestock Products Other than Poultry and Dairy: Dollars
CTL_TX_V	Livestock Sold Alive: Cattle and/or Calves: Dollars
CTL_TA_V	Livestock Sold Alive: Cattle and/or Calves: Cattle, Not Counting Calves: Dollars

Market Value Variables, continued

CTL_TB_V	Livestock Sold Alive: Cattle and/or Calves: Calves: Dollars
SWN_TX_V	Livestock Sold Alive: Hogs and Pigs: Dollars
SHP_TC_V	Livestock Sold Alive: Sheep and Lambs: Dollars
CRO_TO_V	Nursery and Greenhouse Products, Flowers, Vegetable Seeds and Plants, and Bulbs, Grown for Sale: Nursery and Greenhouse Products, Flower and Vegetable Seeds and Plants, Flowers, and Bulbs Sold: Dollars
